

DAVID OLSON, MHA, FACHE
Health Care Executive

Project Role

Mr. Olson will continue to support the project as an Operations Manager, supervising non-clinical operations and ensuring the timeliness of deliverables.

Experience Summary

Transformational leader at community hospitals and integrated health systems for strategic planning, business development, and operations management across a comprehensive array of services, including acute care, ambulatory services, physician practices, home health, hospice, managed care, community health, post-acute care, and population health management.

- Proven ability to bring people together to successfully plan, develop, and improve organizations, programs, services, and facilities based on analytical evidence and developing shared vision.
- Effective relationship-centered leadership focused to meet needs; improve patient and customer satisfaction, employee and physician engagement, community perceptions and preference.
- Consistent record of balancing financial performance and fulfillment of service imperatives.
- Committed to inform, encourage, and inspire others with strong mission, vision, and values.
